PROFESSIONAL EXPERIENCE

Software Developer – Romaly (Startup)

Jan 2025 – Present

- Built scalable full-stack features for a **travel-guidance AI application**, improving performance and real-time usability.
- Developed modular UI components and REST APIs to support smooth ML-driven recommendations and data flow.
- Worked with the ML team to deploy models and integrate inference pipelines, enabling intelligent, user-focused travel suggestions.

Software Engineer – AgouraMathCircle

Dec 2024 – Present

- Architected and deployed a **cross-platform React Native** mobile application (Android & iOS) with **.NET Core Web API** and **SQL Server** for secure authentication, enrollment, and academic tracking.
- Spearheaded development of a **React**-based web platform, reusing the existing backend to implement modular components, REST API consumption, and real-time data synchronization.

Technical Mentor – Volunteer (Global) | AgouraMathCircle

- Delivered global training sessions on **React Native full-stack development**, covering UI/UX design, API integration, state management, and end-to-end deployment pipelines.
- Mentored aspiring developers on mobile-first architecture and cross-platform optimization best practices.

EDUCATION

SRM Institute of Science and Technology, Chennai Bachelor of Technology in Computer Science and Engineering
(Specialization: Artificial Intelligence & Machine Learning)

Graduation: May 2028 (Expected)

SKILLS

Core Expertise: Python, React.js, React Native, .NET Core, SQL Server

Backend Development: REST API Architecture, Authentication, Data Modeling, Server-Side Logic

Frontend Development: Component-Based UI, State Management, Cross-Platform Mobile Architecture

Developer Tools: GitHub, Docker, Figma

Additional Skills: System Design, Technical Documentation, Product Engineering, Prompt Engineering, Mentorship

PROJECTS

AI-Integrated Academic Recommendation System

- Built an AI-powered academic support platform that proactively identifies at-risk students and delivers personalized recommendations using machine learning and real-time data pipelines.
- Enabled mobile-first, scalable student advising, reducing advisor dependency by providing actionable guidance to thousands of students automatically.
- Designed with modern full-stack and DevOps practices, ensuring security, scalability, and production-ready deployment.

Certifications

Kaggle: Intro to Programming, Python, Intro to Machine Learning, Pandas, Intermediate Machine Learning, Intro to SQL
